

Dura Lube Engine Treatment Booster

USE IN AUTO, TRUCK, MARINE,
FARM, INDUSTRIAL
LAWN AND GARDEN.
2 CYCLE AND 4 CYCLE ENGINES.
POUR CONTENTS IN
CRANKCASE

Dura Lube Booster is an *Advanced Synthetic Formula* designed to replenish & rejuvenate *any* motor oil, including synthetics, additives, treatments or oil stabilizers.

Regardless of the brand *all* lubricants lose strength and begin to breakdown over time.

**REMOVES SLUDGE
& VARNISH BUILDUP**

**REJUVENATES
AND EXTENDS
PERFORMANCE**

DURA LUBE BOOSTER replenishes key chemicals that help maintain a higher lubricity which reduces friction, heat, wear and returns the base product to its original strength or even better.

It also breaks down sludge and varnish buildup. The need to maintain lubrication integrity is especially important in older and high mileage engines.

Application:

Add to crankcase / oil fill tube.

DURA LUBE BOOSTER works with all brands of motor oils, engine treatments or additives and can be added as a **FULL POUR** at any time between oil changes in gas or diesel engines. For **HIGH MILEAGE** (+50,000 miles) & older vehicles add at each oil change and once between changes.
